**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a portable communicating apparatus, classified in class 345, subclass 169.
- II. Claims 5-9, drawn to a portable communicating apparatus, classified in class 455, subclass 367.

The inventions are distinct, each from the other because of the following reasons:

Invention I refers to a portable communicating device having either a connecting or folding section that relatively displaces a display and body section that is classified in class 345, subclass 169. Invention II refers to a portable communicating device having incoming call informing means that is classified in class 455, subclass 367.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for a foldable PDA and invention II has separate utility such as for a mobile phone. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
